

Student Activity & School-Generated Funds Management

SPARKROCK
SchoolDay

SchoolDay Platform

Manage the full lifecycle of student activities and school-generated funds
— from permission forms to payments and reconciliation —
in one system designed for K–12 districts.

Digital Permission Forms

- Create district-approved digital forms tied to student activities
- See instantly which students have permission to participate
- Maintain secure, time-stamped records for district oversight

Activity Payments (Money In)

- Collect and track online payments, cash, and cheques
- Automatically link payments to the correct activities
- Tag transactions to the appropriate ledger accounts

Financial Controls (Money Out)

- Track vendors and manage activity-related expenses
- Manage invoices and cheques consistent with district controls'
- Maintain consistent oversight across school funds

Data Integration & Reporting

- Connect activity data, SIS information, and payment records
- Support district-level reporting and reconciliation
- Reduce reliance on spreadsheets

How It Works

01

Create student activities and attach digital permission forms.

02

Collect payments and automatically link them to the correct activity and ledger account.

03

Integrate activity and payment data with SIS and finance systems.

04

Access centralized reporting and reconciliation across all schools.
