

Strengthen Oversight of School-Generated Funds

Gain district-wide visibility, stronger financial controls, and audit-ready reporting for student activity funds across every school.

Why SchoolDay

Centralized Controls

- Apply consistent rules across schools — without relying on manual enforcement or school-by-school workarounds.

Payments Tagged at the Source

- Reduce misclassification and rework by tying payments to the right activity and ledger coding from the start.

Clean Data Across Systems

- Connect activity, payment, SIS, and finance data so you're not reconciling across spreadsheets and exports.

Audit-Ready Reporting & Reconciliation

- Get district-level visibility, bank reconciliation support, and records that stand up at year-end — without last-minute cleanup.

What Finance Leadership Gains

Risk Reduction

Stronger controls over cash, cheques, and online payments — with clear audit trails.

Audit Readiness

Records that are complete, consistent, and easy to produce across all schools.

Financial Accuracy

Fewer errors caused by “money now, coding later” processes.

District-wide Oversight

Reporting that rolls up cleanly without chasing schools for data.

Built for How Districts Actually Operate

Purpose-built for school-generated funds (SGF) — not a general accounting system.

Designed to support the full activity lifecycle: permissions + payments + reconciliation + reporting.
